

RAJAN YADAV

Full Stack Developer

9236844016 | rajanyadav29jan@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full-stack developer with hands-on experience across the MERN stack and Java/Spring Boot. I design and ship scalable REST APIs, real-time features (WebSockets), and accessible UIs. Strengths include modular architecture, data modeling, and cloud deployment on AWS. Proven impact through quantified results: system scalability +15%, engagement +20%, response latency -25%.

EDUCATION

Lovely Professional University <i>Bachelor of Technology in Computer Science and Engineering</i>	Oct 2022 – Jul 2026
LBS Senior Secondary School (CBSE) <i>Class XII</i>	May 2021 Percentage: 73.5%

EXPERIENCE

Techvanto Academy <i>Java Trainee Intern (Remote)</i>	Jun 2024 – Aug 2024
- Engineered and deployed Java-based backend services with Spring Boot, REST APIs, and JDBC; optimized queries and refactored modules to deliver a 15% gain in scalability and runtime efficiency. - Built a full-featured Doctor Management System for patient and appointment workflows using Java Swing, Spring Boot, and MySQL; improved usability for 100+ users and increased engagement by 20%. - Refactored core business logic into a modular architecture leveraging the Collections API; reduced code complexity and cycle time by 18% and accelerated debugging/maintenance. - Collaborated with cross-functional mentors and developers to scope requirements, write unit-tested code, and deliver production-ready features under tight timelines.	

PROJECTS

HaloTalk React.js, Node.js, Express.js, MongoDB, Tailwind CSS	[Source]
- Architected a social learning platform connecting learners and mentors for language practice, mock interviews, and Q&A. - Implemented a matching algorithm that pairs users by shared interests (e.g., two learners of C++), improving session relevance and user satisfaction. - Deployed a scalable backend supporting 100+ concurrent sessions and serving 1,000+ users; lifted 30-day retention by 20%.	
Aviora Next.js, TypeScript, Supabase, Sanity, VAPI AI, Clerk	[Live]
- Delivered an AI conversational assistant with a minimal, responsive UI; integrated Clerk for authentication and payment flows for secure, scalable access control. - Implemented real-time voice interaction via WebSockets, supporting 500+ active users and cutting average response time by 25%. - Hardened frontend accessibility and performance with Next.js best practices and Tailwind CSS, increasing session engagement by 15%.	

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C++, C, Java
Frameworks & Libraries: React.js, Next.js, Angular, Node.js, Express.js, Django, Tailwind CSS
Databases: MongoDB, SQL, Firebase, Firestore
Cloud & Tools: AWS (EC2, S3, Lambda), Docker, Git/GitHub, Postman, VS Code, Cursor IDE, JIRA
Concepts: REST APIs, WebSockets, Scalable Architecture, CI/CD, MVC, Authentication & Authorization, API Integration, Responsive Design, Agile, Waterfall Models

ACHIEVEMENTS

- Smart India Hackathon — Runner-Up (2024) — Team Lead:** Built a production-grade prototype in 36 hours during a national-level competition.
- Solved **700+** DSA problems on LeetCode, GfG, and InterviewBit, showcasing solid command over data structures and algorithms.
- Codeforces Specialist (Max Rating: 1506)**, demonstrating competitive programming proficiency.

RELEVANT COURSEWORK

Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks
